

\* 90 Days devops plan.

- I am madhusri Raut.
  - 1) My current level
    - ⇒ I am fresher in 2020 passout.
  - I have no job but I am serious about devops career.
- What is your understanding of devops and cloud engineering?
  - ⇒ My understanding in devops :- devops is a development and IT operation team to build, test, release & maintain software faster and more reliably.
  - ⇒ cloud :- cloud is Internet base server to store data and run application instead of using own computer.
    - e.g AWS
    - Azure
    - GCP (Google cloud platform)
- Why you are starting learning devops & cloud?
  - ⇒ I have learning devops & cloud because I have build a strong career in IT sector. devops help to automate work & cloud helps to run application on the Internet.
- Where do you want to reach?
  - I want to become devops engineer and get a job in a good Company.

• How you will stay consistent every single day?

→ Every day I will study at least 2 hours & complete one small task, and also I will track my progress in notebook & daily revision.
